31 August 2006

Dyno Nobel signs Heads of Agreement with United Group for QNB Project

Dyno Nobel (ASX: DXL) today announced that its wholly owned subsidiary, Dyno Nobel Asia Pacific Limited has entered into a Heads of Agreement with leading construction, infrastructure and industrial services company United Group Limited (ASX: UGL), for the engineering, construction and pre commissioning of a prospective ammonium nitrate plant at Moranbah, Queensland ("QNB").

Chief Executive Officer of Dyno Nobel, Mr Peter Richards, said "United Group was proactive in developing a strong alliance based approach to ensure successful project delivery."

Dyno Nobel will work towards a final contract in October 2006 and contract progression will be conditional upon conclusion of other project agreements including those for supply of raw material inputs to production. Mr Richards said "Importantly, the final contract will be performance driven, with United Group sharing some of the project risk in regards to deadlines and budgets being met."

The Heads of Agreement includes a set finish date for the plant to ensure it is producing ammonium nitrate in the fourth quarter of 2008.

"As previously expressed, QNB is potentially a company transforming project, however, the Board will proceed only if the project economics are favourable to shareholders. This will include securing strong pre-commitments from customers," Mr Richards said.

Additionally, Dyno Nobel has signed a Letter of Intent with global engineering group, SNC-Lavalin pertaining to its appointment in the Dyno Nobel QNB project management team. Should the project proceed, SNC-Lavalin would play a key role in ensuring the project is completed on time and within budget. SNC-Lavalin is listed on the Toronto Stock Exchange and is one of the leading groups of engineering and construction companies in the world, and a global leader in the ownership and management of infrastructure.
